### **Cape Henlopen School District Employee Doing Well After Positive Test**

*March 30, 2020, Lewes, Delaware* – On March 20 the Cape Henlopen School District announced that a staff member associated with Bus 57 had tested presumptively positive for COVID-19 (coronavirus).

“We are happy to report that as of Friday, March 27, 2020, our employee who had previously tested positive for COVID-19 has been cleared by the Delaware Department of Health,” said Robert Fulton, Superintendent of Cape Henlopen School District. “We are happy to hear that they are doing well, and wanted to ease any worry our community may have.”

Throughout the staff member’s illness, they were isolated at home and only experienced mild symptoms.

As a reminder to all of our community members, should you or someone within your household or family develop symptoms such as coughing, fever and shortness of breath, you should contact the Delaware Division of Public Health at 1-866-408-1899 or your primary healthcare provider. If you experience symptoms and do not have a health care provider, contact Division of Public Health’s Dana Carr at [Dana.Carr@delaware.gov](mailto:Dana.Carr@delaware.gov) or 1-703-942-9912.

Please remember to adhere to Delaware Division of Public Health’s guidelines of limiting social contacts by practicing social distancing, finding alternative ways to greet people that don’t involve shaking hands, as well as practicing good hand and cough hygiene.
